

NORMAN L. HEILWEIL, CPIM
President, Manufacturing Education Institute

Norm Heilweil is President of the Manufacturing Education Institute, a firm specializing in consulting, counseling, education and training. He has more than 25 years of varied manufacturing experience with both small and large firms. His areas of expertise are in the business application of manual and computerized systems.

Norm's abilities enable him to evaluate the business/system flow of manufacturing companies. The findings are translated for management into a conceptual flow and are detailed for the users.

Since 1983, Norm has helped many manufacturing companies improve their productivity. This has been done not only through the system improvements of the manufacturing flow, but also by working with individuals and small groups to implement a positive change.

Norm earned a B.S. in Mechanical Engineering and a Masters degree in Industrial Engineering from NYU College of Engineering. He is certified by APICS and is a past president of the Long Island Chapter. As the Director of Education, he initiated an extensive array of learning programs. Norm currently serves as the VP of Education and is a frequent speaker at APICS international conferences, seminars and chapter meetings. He conducts seminars both publicly and in-house.

Norm is also on the faculty of the National Association of Purchasing Management of NY.
