

RICHARD JOHANSON  
CFPIM, CIRM, CSCP  
Senior IT Systems Analyst, BAE Systems

Rich Johanson is currently a Senior IT Systems Analyst. His experience includes both Oracle ERP Systems implementations and Baan ERP applications development. He is certified by APICS as a fellow in production and inventory management, certified in integrated resource management, and certified as a supply chain professional.

Rich began his 25-plus-year career in industry as a Material Planner and Supervisor at a high-volume commercial electronics component manufacturer. Upon completing his MBA from Long Island University, he secured a position with his current employer, a legacy company of BAE Systems. After several years in Manufacturing Program Management, Rich became manager of its master scheduling department – dividing his time between the day-to-day operation of the master scheduling function and the implementation projects for their ERP systems.

Rich has been teaching the APICS certification courses and mini-series for more than 15 years, and has been a dinner speaker at its NYC-LI Chapter events. He is also an adjunct lecturer at SUNY Stony Brook and has guest lectured at SUNY Farmingdale.
