

RONALD MONDOLINO

President and COO, Metpar Corporation

Ronald Mondolino is a seasoned executive with 30 years of experience directing single and multi-plant manufacturing organizations producing mechanical, electrical and electronic products for both consumer and military markets.

He has a proven track record in identifying non-value-added procedures, revitalizing stagnant functions, and driving quality improvements and customer satisfaction to achieve genuine results.

Ronald is currently President and COO of Metpar Corporation, located in Westbury, NY. He has previously directed organizations with supply chains and facilities internationally, including Mexico. These include top companies such as Grumman Aerospace, Liftmaster and Emerson Electric.

Ronald earned a BS degree in Physics from Long Island University and MBA credits from Adelphi University. He also has extensive training in communications, leadership, manufacturing technology and Statistical Process Control (SPC) from professional training courses taken at Cornell, Yale, Wharton and the Society of Manufacturing Engineering (SME).
